WONDER®

Wonder. Shouldn't You?™

Features & Benefits

- ▶ **10% lighter, 20% faster** - The redesigned, reengineered Double Edge Gas Hedge Trimmers are faster and lighter than previous models. This translates to better performance, lowered user fatigue, and higher profits!
- ▶ **Lower profile design** - The overall lowering of the engine profile allows the user to use the unit comfortably in many different positions.
- ▶ **Superior blade design** - Stamped, thru-hardened high carbon tool steel blades maintain a sharp edge longer. This means less downtime for maintenance. Little Wonder blades last much longer than other blades.
- ▶ **Double reciprocating blades** - Most hedge trimmers feature only one set of blades that move. Little Wonder Gas Hedge Trimmers feature double reciprocating blades for reduced vibration and neater cuts.
- ▶ **Cuts up to 1" diameter growth** - Our hand straightened blades enable you to easily shear new growth, as well as established heavy growth.
- ▶ **Anti-vibration shock mounts** - Increase user comfort over longer jobs.
- ▶ **Gears designed for more power** - Case hardened steel gears for durability and longer life. Rear handle mount accepts support from frame bar.
- ▶ **Frame bar** - Designed to be the strongest in the industry, without any unnecessary weight.
- ▶ **21.22cc commercial grade engine** - For extended engine life. Two large ball bearings where the crankshaft connects to the block and a high quality needle bearing on the connecting rod ensures cooler operation. Also features electronic ignition, chrome lined cylinder, and two ring piston.
- ▶ **Built in centrifugal clutch** - Engages blades only when engine goes above idle speed; reduces possible damage to gears if cutter bar ever jams.
- ▶ **Reliable starting and performance** - Engine features electronic ignition and primer bulb carburetor for easy starts, a weighted fuel line so that the unit can operate in any position. C.A.R.B. certified.
- ▶ **Designed for added user comfort** - Shock mounts in handles reduce vibration, and the precision balanced design make these units easier to use over extended periods.
- ▶ **Throttle features** - Finger throttle control and lock out lever give the user enhanced engine and blade control to prevent inadvertent blade engagement.
- ▶ **Safety comb** - Holds thick growth longer for superior cutting performance, and reduces the risk of injury.

Redesigned for Greater Performance and Profitability

At Little Wonder, we strive to surpass the demands of the landscaping professional. As operating costs continue to increase, the tools of the business have to become more efficient. Our new Double Edge Gas Hedge Trimmer design does just that!

It has been redesigned to be **10% lighter, and 20% faster** than previous models. This means you can use it longer, and achieve greater results.

With a blade speed of 4100 cuts per minute, double reciprocating blades, and a dual cutting motion, this hedge trimmer performs faster than any of our previous models.

The new front loop handle allows the user to operate the hedge trimmer from many different positions. And, the lowered profile also makes it easy to reach over the engine. These features guarantee a superior cutting tool.

The Double Edge Hedge Trimmer is available in 19", 24", and 30" models to suit the needs of every landscaping job.
