Federal Communication Commission Interference Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- 1. Reorient or relocate the receiving antenna.
- 2. Increase the separation between the equipment and receiver.
- 3. Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- 4. Consult the dealer or an experienced radio technician for help.

FCC Caution

To assure continued compliance. (example-use only shielded interface cables when connecting to computer or peripheral devices). Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This device complies with Part 15 of the FCC Rules. Operation is subject to the Following two conditions: (1) This device may not cause harmful interference, and (2) this Device must accept any interference received, including interference that may cause undesired operation.

Federal Communication Commission (FCC) Radiation Exposure Statement

This equipment complies with FCC radiation exposure set forth for an uncontrolled environment. In order to avoid the possibility of exceeding the FCC radio frequency exposure limits, human proximity to the antenna shall not be less than 20 cm (8 inches) during normal operation.

CE mark Warning

The is a class B device, In a domestic environment, this product may cause radio interference, in which case the user may be required to take adequate measures.

Trademarks

The PLANET logo is a trademark of PLANET Technology. This documentation may refer to numerous hardware and software products by their trade names. In most, if not all cases, these designations are claimed as trademarks or registered trademarks by their respective companies.

WEEE regulation

To avoid the potential effects on the environment and human health as a result of the presence of hazardous substances in electrical and electronic equipment, end users of electrical and electronic equipment should understand the meaning of the crossed-out wheeled bin symbol. Do not dispose of WEEE as unsorted municipal waste and have to collect such WEEE separately.

Chapter1 Introduction

The BT-510U/520U is designed to connect USB port of a desktop or laptop PC, and allows the computer to build a short-range wireless connection to other Bluetooth devices like cellular phones, PDAs, and computers. Since the transmission medium of BT-510U/520U is air, PLANET also enhances both connection protection and data security mechanism to the product which helps people share and access trigger information. Compliant with Bluetooth specification Version 2.0 + EDR, BT-510U/520U can provide transfer rate up to 3Mbps, which is higher than Bluetooth v1.2 device.

The BT-510U/520U provides services of virtual serial port, dial-up networking, fax, file transfer, information exchange, information synchronization, and network access. With powerful bundled software, it's not difficult to implement configuration and management even there are so many functions. Most popular operating system support, including Windows 98SE, ME, 2000, XP and Server 2003, makes the application of BT-510U/520U more flexible.

Link your notebook with your handheld, mobile phone, printer, audio gateway and other Bluetooth devices within your personal area network (PAN) via a secure short-range wireless radio link. Get rid of all those hassle cables and automatically share documents, browse the Internet and synchronize calendars, address books and more.

1.1 Features

- Compatible with Bluetooth Core Specification Version 2.0 + EDR (Enhanced Data Rate)
- > Bluetooth Manager Utility eases the difficulties of configuration and management
- Date rate up to 3Mbps
- Lower power consumption through reduced duty cycle
- Simplification of multi-link scenarios due to more available bandwidth
- Backwards compatible to Bluetooth V1.1/V1.2 specifications
- > Further improved BER (Bit Error Rate) performance
- Connection protection and data security enhanced mechanism
- > Up to 8 devices Point-to-MultiPoint topology expands your PAN coverage
- Various services provided: Virtual Serial Port, Dial-up Networking, Fax, File Transfer, Information Exchange, Information Synchronization, and Network Access
- > Multilingual support in Bluetooth utility
- Most popular OS support: Windows 98SE/Me/2000/XP and Server 2003
- BT-510U has suppor Bluetooth Class 1, it can provide bigger cover area for user to connect their Bluetooth device longer

1.2 Packet Content

The following items should be included:

- 1 * Bluetooth V2.0 USB Adapter
- 1 * CD-ROM (includes Driver, Utility, Manual)
- 1 * Quick Installation Guide

If any of the above items are damaged or missing, please contact your dealer immediately.

1.3 Supported profiles

Windows 98SE/ME

This Bluetooth Stack for Windows supports the following profiles. Please note that profiles HSP, PAN, BIP, A2DP, AVRCP and GAVDP are supported by Windows XP and Windows 2000 only.

(a) DUN

(b) FAX

(c) LAP

(d) SPP

(e) HID

(f) HCRP

(g) FTP

(h) OPP

Windows 2000/XP

(a) DUN
(b) FAX
(c) LAP
(d) SPP
(e) HID
(f) HCRP
(g) FTP
(h) OPP
(i) HSP
(j) PAN

(k) BIP (I) A2DP (m) AVRCP

(n) GAVDP

1.4 Supported languages

The Bluetooth Stack for Windows supports the following languages.

English Danish French German Italian Japanese Norwegian Spanish Swedish

The following languages are supported by Windows 2000/XP and Windows Server 2003 only.

Dutch Korean Simplified Chinese Traditional Chinese Russian Finnish Portuguese (Brazil)

1.5 Supported operating systems

The Bluetooth Stack for Windows supports the following operating systems.

Windows 98 Second Edition Windows ME Windows 2000 Professional (Service Pack 3 or above) Windows XP Professional (Service Pack 1 or above) Windows XP Home (Service Pack 1 or above) Windows XP Tablet PC Edition Windows XP Media Center Edition Windows Server 2003

1.6 Limitations

(a) External Bluetooth drivers cannot be "signed drivers" to receive Microsoft WHQL logo. Therefore, Microsoft's "Unsigned driver" warning messages may pop up during the software installation, Bluetooth headset, mouse or keyboard setup. Please install the drivers and then follow the on-screen instructions.

(b) On Swedish Windows XP, an error message (error code = 633) may be seen during dial-up. Please update the operating system to Windows XP Service Pack 2 or refer to Microsoft knowledge base #831717.

(c) Windows XP fast user switch is not supported. When switching to another user, the Bluetooth Manager is not launched. Please log off before switching to another user.

(d) If "automatic FAX receiving" is enabled on Microsoft FAX manager, and if DUN, FAX, or LAP profile icon is registered on Bluetooth Settings, and then Bluetooth's "resume from standby" may take a couple of minutes to turn on.

(e) Windows 98 Second Edition: If the "Install New Modem" dialog pops up when setting up a Bluetooth modem, mobile phone, or access point, please choose "Don't detect my

modem; I will select from a list". Otherwise, the system may freeze during the modem detection. If the manual for your Bluetooth device does not specify a modem driver, then please select "Standard 33600bps modem".

(f) Before connecting or disconnecting a Bluetooth headset, please exit any voice or sound-related applications (e.g. Windows Messenger, Windows Media Player). The audio input and output may not be switched properly if those applications are running. This same precaution is important prior to system standby, hibernate or shutdown, and prior to turning off or unpluging the primary Bluetooth device.

2

Chapter 2 Setup for Windows 98SE/ME/2000/XP/2003

Installing Bluetooth software for Windows

- 1. Insert the Drivers and User's Manual CD into CD-ROM drive to initiate the autorun program. Once completed, a menu screen will appear.
- 2. Install the Bluetooth software by click the "**Bluetooth Software**" hyperlink of the menu screen to activate the installation for the application program.

If the menu screen doesn't appear, please start the installation as follows.

- Click "Start" button.
- Click "Run".
- Enter "E:\Utility\setup.exe" to the appeared dialog box, suppose "E" is your CD-ROM drive.

Click on "**OK**" button.

3. When the License Agreement screen is displayed, read the License Agreement, then click the radio button to the left of "I accept" and then click the "Next" button.

Chapter 3 Basic setting

Methods for registering new devices using the Bluetooth Utility shall now be described. A Bluetooth mouse shall be connected and set up using [Bluetooth Settings] as an example.

[Bluetooth Settings] provides two set-up methods: "Express Mode" and "Custom Mode."

• Express Mode

[Bluetooth Settings] will automatically detect and register services. If several services (profiles) are supported by the device the service that has been set to the highest priority shall be selected and registered.

Express Mode is normally recommended for device set-up.

Custom Mode

After having been detected, the services supported by the device are displayed as a list, from which you can select the desired function(s).

Custom Mode must be used to set up a device if, for example, you wish to use a modem station to send a fax (because in Express Mode, the DUN profile will be automatically selected since it has a higher priority than the FAX profile).

The differences between setting up the same device (a Bluetooth mouse) using Express Mode and Custom Mode are described on the following pages.

3.1 Express Mode Set-up

3.1.1 Starting Bluetooth Settings

Click [Start]→[All Programs]→[Bluetooth]

Note

. The same result can be achieved by right-clicking on the Bluetooth icon in the task tray and selecting [Bluetooth Settings] from the menu that appears.

	Yes	No			

When the icon appears as shown below, the connection will have ended.

4.1.2 Connecting to the internet using a mobile telephone Important

. In order to connect to the Internet, you must have already signed up with a provider and obtained a connection ID and password. Please ensure you have confirmed the ID, password and telephone number of your provider's access point before you begin the set-up process.

. A Bluetooth passkey (PIN code) is required for you to connect to the mobile telephone. Please make a note of your Bluetooth passkey before you start the set-up process.

Configuring a mobile telephone for use a modem

- 1. Turn on the mobile phone, and set it to be connectable via Bluetooth.
- 2. Right-click the Bluetooth icon in the task tray, and then click on [Add New Connection].

Note

. Alternatively, click [Start] \rightarrow [All Programs] \rightarrow [Bluetooth] \rightarrow [Bluetooth Settings], and then click on [New Connection] from the active [Bluetooth Settings] window.

3. Confirm that [Express Mode] has been selected, and then click on the [Next] button.

The [Add New Connection Wizard (Searching for Bluetooth devices)] window will appear.

Add New Connection Searching for Blue	
	Searching for Bluetooth devices.
	< Back Next > Cancel

4. Select the device name of the mobile telephone from [Device List], and then click on the [Next] button.

Add New Connection Select a device	n Wizar d 🛛 📓

4.3 Sending files

You can send and receive files other than business card data with a Bluetooth-enabled PC or PDA.

Use "File transfer" in the Bluetooth Information Exchanger to exchange files.

Note

. The same operations will be valid as long as the PC and PDA support the FTP profile

. "File transfer" cannot be used to send or receive business card data. Please instead use "Object Push" to perform these activities.

4.3.1 Exchanging files with a PC or PDA

Sending files to a PC or PDA

- 1. Turn on the PC or PDA.
- 2. Double-click on the Bluetooth Information Exchanger icon on the Desktop.

Note

. Alternatively, opening Explorer and clicking on the Bluetooth Information Exchanger folder will produce the same result.

3. Double-click on the [File transfer] icon.

A list of devices will appear in the [File transfer] window.

😫 File Transfer

Shared Folder PC-	1 PDA-1	PDA-2	

Note

. If the desired device does not appear in the list, please confirm that the device has been turned on, and then select [Bluetooth] \rightarrow [Search Devices]. A device search will be performed.

. You can also use "Image transfer" when sending individual image files.

4. Use the mouse to drag and drop the file you wish to send over the destination icon.

In this case, the file will be sent to a PC named "PC-1".

Note

. When using "File transfer", you can send individual files as well as entire folders.

5. Confirm that the file is being sent.

The file will be sent to the PC.

Note

. When sending files using "File transfer", a message requesting permission to receive the files may appear on the destination (receiving) device. The content of the message will vary with the Bluetooth software installed on the destination device, so please be sure to follow the instructions provided.

If you are using the Bluetooth Utility, a message similar to the one below will appear.

	ile Receive Confirmation
A:F3?	Do you allow a Connect Request from 00:30:
	Save Folder
ment: Browse	C:\Documents and Settings\Administrator\M

# 4.4 Exchanging business card data with a PC or PDA

You can exchange business card data with a Bluetooth-enabled PC or PDA. Business card data are exchanged using "Object Push" under Bluetooth Information Exchanger.

# Selecting a business card and sending it to a PC or PDA

- 1. Turn on the PC or PDA.
- 2. Double-click on the Bluetooth Information Exchanger icon on the Desktop.

#### Note

. Alternatively, opening Explorer and clicking on the Bluetooth Information Exchanger folder will produce the same result.

# 3. Double-click on the [Object Push] icon.

A list of devices will appear in the [Object Push] window.

#### Note

. If the desired device does not appear in the list, please confirm that the device has been turned on, and then select [Bluetooth]→[Search Devices]. A device search will be performed.

4. Use the mouse to drag and drop the business card you wish to send over the destination icon

In this case, the business card will be sent to a PC named "PC-1".

#### Note

. When you try to send a business card, a message requesting permission to receive the card may appear on the device belonging to the other party (i.e., on the receiving end). The content of the message will vary with the Bluetooth software installed on the destination device, so please be sure to follow the instructions provided. If you are using the Bluetooth Utility, a message similar to the one below will appear.

Do you allow	a Connect Request from 00:30:4F:04:BA:F3?
Save Folder	
C:\Docume	nts and Settings\Administrator\My Document: Brows

If the business card has been sent successfully, the message below will appear. Please click on the [OK] button.

Bluetoo	th 🛛 🔀
(į)	Business Card transfer was successful.
	ОК

The message below will appear if the business card transmission was unsuccessful.

Please click on the [OK] button to close the message, and repeat the procedure.

# Selecting your personal business card

You can prepare a business card bearing your name and other details such as your company and telephone numbers, and then send it to another party.

#### Note

. Alternatively, opening Explorer and clicking on the Bluetooth Information Exchanger folder will produce the same result.

#### 1. Turn on the PC or PDA.

2. Double-click on the Bluetooth Information Exchanger icon on the Desktop.

#### Note

. Alternatively, opening Explorer and clicking on the Bluetooth Information Exchanger folder will produce the same result.

# 3. Double-click on the [Object Push] icon.

A list of devices will appear in the [Object Push] window.

# 4.5 Synchronizing data with a PDA

When you connect via Bluetooth instead of with a standard cable, you will always be able to synchronize your data without the hassle of having to connect the cable.

# 4.5.1 Connecting using ActiveSync

# Preparing the PC

1. On the PC, click on [Start]→[All Programs]→[Microsoft ActiveSync].

The initial ActiveSync set-up window will appear.

It is assumed in the explanation below that no ActiveSync connections have been established with other devices.

### Note

. In the standard set-up, the port is configured to "COM7" (refer to Steps (3) and (4) under "Preparing the PDA" below). When using a different port, please also change the port number selected in this window

### Preparing the PDA

1. Tap on the Bluetooth icon in the bottom right of the screen.

#### Important

. The graphic above shows an example of a PDA operating window.

The connection procedure may be different depending on the manufacturer or model of PDA you use. Please refer to the product instruction manuals for further details.

The [Bluetooth Settings] window will open.

The message "Connection not registered" will appear if no Bluetooth device has been registered.

Please tap on [OK] to close the message.

2. Double click on [Tools] $\rightarrow$ [Search for peripheral components].

# Establishing a partnership between ActiveSync and a PDA

Once a connection has been successfully established with a PDA, the procedure for establishing a partnership with the PDA will be started by the ActiveSync application on the PC.

Performing this set-up procedure will enable data to be synchronised between your PC and PDA.

1. In the [New Partnership (Set Up a Partnership)] window, select "Standard partnership", and then click on the [Next] button.

The [New Partnership (Specify Data Synchronisation Method)] window will appear.

2. Select "Synchronise with this PC", and then click on the [Next] button.

Click on the [Yes] button when the confirmation message appears.

# 4.6 Fax transmission

# 4.6.1 Using a modem station for fax transmission Important

. Please refer to the modem station instruction manual for information on how to connect the station to a telephone line.

. Please ensure that any drivers used to connect the PC to the modem have been installed.

. A Bluetooth passkey (PIN code) is required for you to connect to the modem station. Please make a note of your Bluetooth passkey before you start the set-up process.

. A fax application is required for you to be able to send and receive faxes. The description below is based on a example using Microsoft Fax, which is installed with Windows XP as standard.

If you are going to use a commercially available fax application, then please refer to the manual that came with the application for information on how to send and receive faxes.

# Setting up the modem station

# 1. Turn on the wireless modem station.

2. Right-click on the Bluetooth icon in the task tray, and then click on [Add New Connection].

Remote Camera         Add New Connection         Device Properties and Security         Service Properties         Help	-				Bluetooth Settings Wireless File Transfer

# 4.6.2 Using a mobile telephone for fax transmission Important

. Please ensure that any drivers used to connect the PC to the mobile telephone have been installed.

. Bluetooth passkey (PIN code) is required for you to connect to the mobile telephone. Please make a note of your Bluetooth passkey before you start the set-up process.

. A fax application is required for you to be able to send and receive faxes. The description below is based on a example using Microsoft Fax, which is installed with Windows XP as standard.

#### Setting up the mobile telephone

- 1. Turn on the mobile telephone, and set it to be connectable via Bluetooth.
- 2. Right-click on the Bluetooth icon in the task tray, and then click on [Add New Connection].

# Note

. Alternatively, click [Start] $\rightarrow$ [All Programs] $\rightarrow$ [Bluetooth] $\rightarrow$ [Bluetooth Settings], and then click on [New Connection] from the active [Bluetooth Settings] window. The [Add New Connection Wizard (Welcome to the Add New Connection Wizard)] window will appear.

# 3. Select [Custom Mode], and then click on the [Next] button.

The [Add New Connection Wizard (Searching for Bluetooth devices)] window will appear.

Add New Connectio Searching for Blu		
	Searching for Bluetooth devices.	
	< Back Next >	Cancel

Once the program has finished searching for the devices, the [Add New Connection Wizard (Select Device)] window will appear.

4. Select the device name of the mobile telephone from [Device List], and then click on the [Next] button.

Add New Connection	Wizard 🛛 👔
Select a device

	Set the CDM port to use. (We recommend using the default COM port.) Assignment of COM Port Name COM41  Auto Connect Use default COM port
	< <u>₿</u> ack <u>N</u> ext > Cancel

# Note

. The mobile telephone will be installed to the grayed-out COM port displayed under [Assignment of COM Port] in this window. You will be specifying this COM port in Step (3) of "•Installing a Modem", so please write it down for future reference.

The [Add New Connection Wizard (Connecting to Remote Device)] window will appear.

The [Add New Connection Wizard (Modem Settings)] and [Phone and Modem Options] windows will appear.

8. Click on the "Add..." button in the [Phone and Modem Options] window. The [Add New Hardware Wizard (Install New Modem)] window will appear. Install the modem by following the instructions in the windows that follow.

Attached To CDM3
COM3

# Installing a modem

The [Add New Hardware Wizard (Install New Modem)] window will appear.

1. Check [Don't detect my modem; I will select it from a list], and then click on the [Next] button.

A list of modem manufacturers and models will appear.

2. Select the desired mobile telephone from under [Manufacturer] and [Models], and then click on the [Next] button.

# Note

. If you have not yet installed a mobile telephone driver, click on the "Use Device" button to install one from this window.

. If no mobile telephone drivers appear, please select "(Standard Modem Types)" and "Standard 33600 bps modem."

A window will appear where you can specify the port to which you can install the modem.

3. Select "Selected Port", specify the COM port to which the modem will be installed, and then click on the [Next] button.

Select the port(	s) you want to install the modem on.	
	You have selected the following modem:	
	Bluetooth Modern	1
	On which ports do you want to install it?	
A. Constant	C All ports	
	Selected ports	
	COM1	
	CDM6 COM7	
	COM40	
·····	and States	

#### Important

. Please specify the COM port displayed in the window pertaining to Step (7) under "●Setting up the modem station."

# 4. Click on the [Continue] button.

The wizard will display the following window by design, but you may disregard it and click on the "Continue" button.

A window will appear indicating that the modem installation is complete.

5. Click on the [Finish] button.

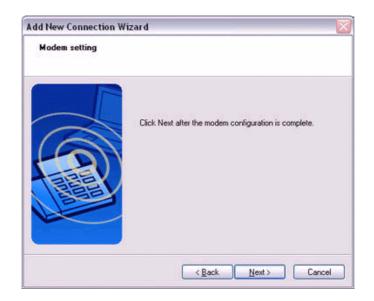

6. Confirm that the configured modem has been added to the list in the [Phone and Modem Options] window, and then click on the [OK] button.

Modem		Attached To	
Bluetooth Mode	m	COM40

The [Next] button will be enabled on the [Add New Connection Wizard (Modem Settings)] window.

7. Click on the [Next] button on the [Add New Connection Wizard (Modem Settings)] window.

The [Add New Connection Wizard (Connection Name Settings)] window will appear.

8. Enter the type and name of the icon displayed after registration, and then click on the [Next] button.

Please click on the [Next] button if you are satisfied with the settings.

Add New Connection \ Enter a name and se	
	Set up the connection name and icon.  Setting information  Connection Name:  EAX  Icon  Change Icons  Create a shortcut on the desktop
	< <u>B</u> ack. <u>N</u> ext > Cancel

The [Add New Connection Wizard (Completing the Add New Connection Wizard)] window will appear.

# 9. Click on the [Finish] button.

The settings will be registered, and the icon will appear in the [Bluetooth Settings] window.

# Setting fax information

Configure send/receive settings and register fax information.

1. Select [Start]→[Control Panel], and then double-click on the [Printers and Other Hardware] icon .

Note

. If the control panel is displayed in "Classic view", and you use Windows 2000, please start from Step (2).

- 2. **Double-click on the [Printers and Faxes] icon.** The [Printers & Faxes] window will appear.
- 3. Click on "Install a local fax printer" in the [Printers and Faxes] window.

A window showing installed programs will appear, and a Fax icon will have been created in the [Printers and Faxes] screen.

4. Click on "Send a fax" under "Printer Tasks" on the left side of the window.

If you have not yet configured a fax device, the [Fax Configuration Wizard] window will appear. In the window you can enter settings pertaining to the sender (yourself).

# Note

. If the fax configuration information has already been registered, the [Send Fax Wizard] window, which can be viewed under "Sending a fax" below, will appear instead of the [Fax Configuration Wizard] window.

# 5. Enter the sender information, and click on the [Next] button

Sender Inform Enter sende	and the second se	il appear on fax cover pages.	E

Taking several consecutive frames

1. Click on the button in the operating window. A succession of images will be captured and sent to the PC.

# Note

. The remote camera shutter cannot be operated while the camera is connected to the PC.

. The number of consecutive pictures taken can be set to anywhere between 2 and 16.

- 1. In the [Remote Camera] window, click on [Bluetooth]→[Properties]→ [Consecutive Image Settings].
- 2. Click on the [<][>] buttons to select the number of consecutive images to be captured.

Change number	or cons	ccut	
umber of imag	jes:	3	•
ſ	ОК		ance

# Note

. Images are not only sent to the PC, but are stored in the camera's on-board memory as well.

Please be aware of the remaining memory capacity when you are taking a large number of pictures.

. Large file sizes are common for high-resolution images, and may take some time to be transferred to the PC.

# Viewing images saves on your PC

A "Remote Camera" folder will be created in the "Bluetooth" folder under "My Documents" during initial set-up. A folder bearing the same name as the camera will be created in it, and images will be saved in this folder.

Click the [Explorer] button in the [Remote Camera] window to display the folder where the images have been saved.

#### Note

. This window is an example showing pictures when [Filmstrip] has been selected from the [View] menu in Explorer.

# 4.8 Using a headset to communicate

# Registering the headset

1. Right-click on the Bluetooth icon in the tasktray, then click on [Add New Connection Wizard].

#### Note

. Alternatively, you can click on [Start]>[All Programs]>[Bluetooth]>[Bluetooth]>[Bluetooth]>[Bluetooth]>[Bluetooth]>[Bluetooth]>[Bluetooth]>[Bluetooth]>[Bluetooth]>[Bluetooth]>[Bluetooth]>[Bluetooth]>[Bluetooth]>[Bluetooth]>[Bluetooth]>[Bluetooth]>[Bluetooth]>[Bluetooth]>[Bluetooth]>[Bluetooth]>[Bluetooth]>[Bluetooth]>[Bluetooth]>[Bluetooth]>[Bluetooth]>[Bluetooth]>[Bluetooth]>[Bluetooth]>[Bluetooth]>[Bluetooth]>[Bluetooth]>[Bluetooth]>[Bluetooth]>[Bluetooth]>[Bluetooth]>[Bluetooth]>[Bluetooth]>[Bluetooth]>[Bluetooth]>[Bluetooth]>[Bluetooth]>[Bluetooth]>[Bluetooth]>[Bluetooth]>[Bluetooth]>[Bluetooth]>[Bluetooth]>[Bluetooth]>[Bluetooth]>[Bluetooth]>[Bluetooth]>[Bluetooth]>[Bluetooth]>[Bluetooth]>[Bluetooth]>[Bluetooth]>[Bluetooth]>[Bluetooth]>[Bluetooth]>[Bluetooth]>[Bluetooth]>[Bluetooth]>[Bluetooth]>[Bluetooth]>[Bluetooth]>[Bluetooth]>[Bluetooth]>[Bluetooth]>[Bluetooth]>[Bluetooth]>[Bluetooth]>[Bluetooth]>[Bluetooth]>[Bluetooth]>[Bluetooth]>[Bluetooth]>[Bluetooth]>[Bluetooth]>[Bluetooth]>[Bluetooth]>[Bluetooth]>[Bluetooth]>[Bluetooth]>[Bluetooth]>[Bluetooth]>[Bluetooth]>[Bluetooth]>[Bluetooth]>[Bluetooth]>[Bluetooth]>[Bluetooth]>[Bluetooth]>[Bluetooth]>[Bluetooth]>[Bluetooth]>[Bluetooth]>[Bluetooth]>[Bluetooth]>[Bluetooth]>[Bluetooth]>[Bluetooth]>[Bluetooth]>[Bluetooth]>[Bluetooth]>[Bluetooth]>[Bluetooth]>[Bluetooth]>[Bluetooth]>[Bluetooth]>[Bluetooth]>[Bluetooth]>[Bluetooth]>[Bluetooth]>[Bluetooth]>[Bluetooth]>[Bluetooth]>[Bluetooth]>[Bluetooth]>[Bluetooth]>[Bluetooth]>[Bluetooth]>[Bluetooth]>[Bluetooth]>[Bluetooth]>[Bluetooth]>[Bluetooth]>[Bluetooth]>[Bluetooth]>[Bluetooth]>[Bluetooth]>[Bluetooth]>[Bluetooth]>[Bluetooth]>[Bluetooth]>[Bluetooth]>[Bluetooth]>[Bluetooth]>[Bluetooth]>[Bluetooth]>[Bluetooth]>[Bluetooth]>[Bluetooth]>[Bluetooth]>[Bluetooth]>[Bluetooth]>[Bluetooth]>[Bluetooth]>[Bluetooth]>[Bluetooth]>[Bluetooth]>[Bluetooth]>[Bluetooth]>[Bluetooth]>[Bluetooth]>[Bluetooth]>[Bluetooth]>[Bluetooth]>[Bluetooth]>[Bluetooth]>[Bluetooth]>[Bluetooth]>[Bluetooth]>[Bluetooth]>[Bluetooth]>[Bluetooth]>[Bluetoot

The [Add New Connection Wizard (Welcome to the Add New Connection Wizard)] screen will appear.

#### 2. Turn the headset power on.

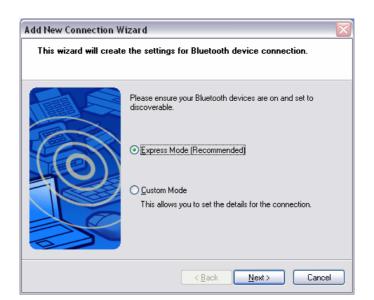

Once you have turned on the headset, set the mode to enable a Bluetooth connection.

#### Important

. The procedure for operating the headset may differ depending on the manufacturer and model.

Please consult your user guide for a detailed description of how to operate the unit.

3. Confirm that [Express Mode] has been selected, then click on the [Next] button.

The [Add New Connection Wizard (Searching for Bluetooth Devices)] screen will appear.

Add New Connection W Searching for Bluetoo	
	Searching for Bluetooth devices.
	< Back Next > Cancel

Once the device search has been completed, the [Add New Connection Wizard (Select a Device)] screen will appear.

4. Select the name of the headset device from the list, then click on the [Next] button.

Please press the headset switch.

# Important

. The procedure for operating the headset may differ depending on the manufacturer and model.

Please consult your user guide for a detailed description of how to operate the unit.

The [Add New Connection Wizard (Configuring (Connecting to Voice Circuit))] screen will appear, and device configuration will be performed.

#### Note

. If you are connecting to the headset for the first time, or if another Bluetooth audio device (for example, the TOSHIBA Speech Recognizer) has not yet been registered, the following [Found New Hardware Wizard] screen will appear, from which you can proceed to install the driver.

If another audio device has already been registered (i.e., the driver has been installed), you can proceed to Step 9 without having to install the driver.

# 6. Click on the [Next] button.

The [Install Hardware] screen will appear.

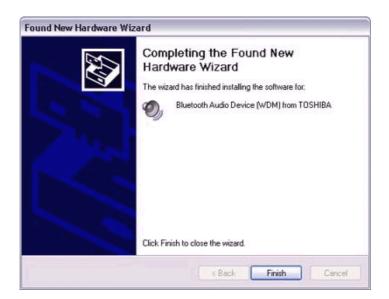

# 7. Click on the [Continue Anyway] button.

The following screen will appear automatically. You may disregard it and click on the [Continue Anyway] button.

The [Add New Connection Wizard (Completing the Found New Hardware Wizard)] screen, which is the final screen of the installation wizard, will appear.

8. Click on the [Finish] button.

Once driver installation is complete, the [Add New Connection Wizard (Enter Connection Name)] will appear.

9. Confirm the information you have entered, and click on the [Next] button.

Add New Connection	Wizard 🛛 🕅
Enter a name and se	elect an icon.
	Set up the connection name and icon.
	Setting information Connection Name: HS01 Icon Description Change Icons
	<back next=""> Cancel</back>

The [Add New Connection Wizard (Completing the Add New Connection Wizard)] screen will appear.

# 10. Click on the [Finish] button.

The configuration information will be registered, and an icon will be displayed in the [Bluetooth Settings] screen.

126

#### Making a connecting to the headset

You can make a connection to the headset from an icon that has been registered in [Bluetooth Settings].

#### Important

. Before making a connection to the headset, please check that you have turned on the headset's power, and it has been enabled for a Bluetooth connection. Please ensure that the following audio-related applications have been closed before you connect the headset to your PC.

- Windows Media Player, BeatJam, InterVideo WinDVD and other music/audio playback software
- o Windows Messenger and other e-conferencing software
- LaLaVoice and other voice-recognition software

If you wish to use these applications, please terminate the headset connection before you launch them.

# 1. Right-click on the headset icon, then click on [Connect].

😽 Bluetooth	n Settings	_ 🗆 🔀
Bluetooth Vie	w Help	
		🕃 Bluetooth
9	111-55	
	Connect Disconnect Delete	
	Detail	
	Create Shortcut on Desktop Rename Change Icons	
	New Connection	X Delete

# 2. Answer with the headset.

A screen will appear indicating that the headset is being called, and a tone will accordingly sound in the headset. Please press the headset switch.

If the connection has been properly established, the icon's appearance will change to indicate a connected state.

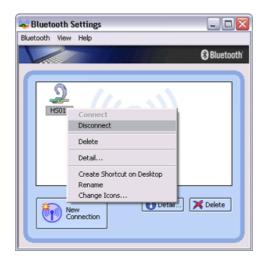

You may now launch conferencing and voice-recognition software and use the headset.

# Disconnecting from the headset

Please follow the steps below to disconnect from the headset.

1. Right-click on the headset icon in the [Bluetooth Settings] screen, then click on [Disconnect].

A message will appear, requesting confirmation that you wish to disconnect. Click on the [Yes] button.

The icon on the [Bluetooth Settings] screen will appear as shown below, indicating that the device has been disconnected.

# **Chapter 5 Advanced features**

- 5.1 Making a device undiscoverable to other users
  - 1. Right-click on the Bluetooth icon in the task tray, and then click on [Device Properties and Security...].

<b>Bluetooth Settings</b> Wireless File Transfer Remote Camera	-

Your device will now be undetectable by other users, even when they search for other devices.

# Note

. Other devices are still able to establish connections with your device even if you have enabled the Non-discoverable mode.

Please enable "Non-connectable mode" if you wish to reject connections from other devices.

# 5.2 Encrypting the content of your transmissions

Since Bluetooth communication is conducted wirelessly, there is always the possibility that a third party may be able to intercept your transmissions. You can use encryption to render the content indecipherable to anyone who manages to intercept it.

# Important

. Encrypting your transmissions will still not guarantee complete security. Accordingly, please be aware that transmitting data is conducted with an element of risk for the user.

1. Right-click on the Bluetooth icon in the task tray, and then click on [Device Properties and Security...].

The [Device Properties and Security] window will appear.

2. Select [Link Level Enforced Security] in [Security Mode] under the [Mode] tab, put a check next to [Encryption], and then click on the [OK] button.

. The window in which you enter the passkey will not appear once you have connected more than two times to the device.

# 5.3 Changing the default connection

The "default connection" refers to the dial-up connection configured for use whenever a connection is made to the Internet.

If several connections have been registered, you can change the default connection by following the procedure below.

- 1. Start Internet Explorer.
- 2. Click on [Tools] $\rightarrow$ [Internet Options...].

The [Internet Options] window will appear.

3. Click on the [Connections] tab.

In this window, "Direct Connection" is set as the default, and "Never dial a connection" has been selected.

Change the settings so that "London A" will always be dialed when you connect to the Internet.

4. Select "Always dial my default connection".

# 5.4 Manually creating a virtual Bluetooth COM port

In order for a PC to connect to and communicate with a Bluetooth device, the Bluetooth Utility will create a gateway for data to be exchanged between the respective devices. This gateway is known as a "port" (or "virtual COM port").

Since one virtual COM port will be allocated to each device, trouble-free communication will still be possible even if several devices are being used.

When you use the Bluetooth Utility, a virtual COM port will be automatically created on set-up; however, virtual COM ports can be created manually if so needed.

#### 5.4.1 Clients and servers

When Bluetooth communications are performed, there will always be a "client/server" relationship between the various devices. A "client" is a device that sends certain requests to another device, while a "server" is a device that provides a service on receipt of such requests from another device.

For example, when a PC issues a print command to a wireless printer, the PC functions as the client, while the printer functions as the server.

When a PDA or other device attempts to receive files located on a PC by means of file transfer protocol, the PC functions as the server, while the PDA functions as the client.

Virtual Bluetooth COM ports can be created both for clients and servers.

# • Bluetooth virtual COM port for a client

Virtual COM port used when your device is the client, and requests are sent to another device.

#### • Bluetooth virtual COM port for a server

Virtual COM port used when your device is the server, and requests are received from another device.

#### 5.4.2 Creating a virtual COM port

1. Click on the [Printers and Other Hardware] icon in the Control Panel.

The [Printers and Other Hardware] window appears.

2. Double-click on the [Bluetooth Local COM] icon.

The main Bluetooth Local COM window will appear.

#### Note

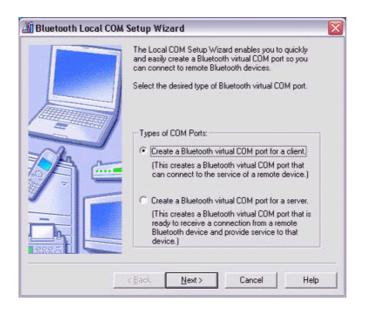

. Even when the Control Panel appears in Classic view, please simply click on the [Bluetooth Local COM] icon.

- No such distinction between viewing formats exists in Windows 2000.
- 3. Click on the [Add...] button.

Port	Description	Owner

# **Chapter 6 FAQ**

# 6.1 General operation of the Bluetooth Utility

# **Bluetooth Manager**

Q: Bluetooth icon does not appear in task tray.

 If the Bluetooth icon does not appear in the task tray, Bluetooth Manager will not be active, which will prevent you from being able to use any of the functions of the Bluetooth Utility.
 Start the utilities as instructed below to enable Bluetooth Manager to start automatically and allow all functions to be utilized.

# **Bluetooth Settings**

(from Windows XP) [Start] > [All Programs] > [Bluetooth] > [Bluetooth Settings] (from Windows 2000) [Start] > [Programs] > [Bluetooth] > [Bluetooth Settings]

# **Remote Camera**

(from Windows XP) [Start] > [All Programs] > [Bluetooth] > [Remote Camera] (from Windows 2000) [Start] > [Programs] > [Bluetooth] > [Remote Camera]

# Wireless File Transfer

(from Windows XP) [Start] > [All Programs] > [Bluetooth] > [Wireless File Transfer] (from Windows 2000) [Start] > [Programs] > [Bluetooth] > [Wireless File Transfer]

Q: Unable to turn on Bluetooth.

• If the wireless communication switch on your PC has been turned off, the message below will appear, and you will not be able to turn the power on from Bluetooth Manager.

Please confirm whether the wireless communication switch has been turned on.

# Bluetooth Settings

- Q: Clicking on the [New Connection] button brings up the message "Unable to prepare Bluetooth."
- The wireless communication switch is turned off. Please switch it on.
- Q: Remote device(s) cannot be detected
- The other device(s) may have been set to Non-discoverable mode. Please check the mode settings on the device.
- Q: Services on a remote device are undiscoverable
- The other device may be using a profile that is not supported by the Bluetooth Utility
   Please check the profile being used on the other device.
- The following profiles are compatible with Bluetooth Settings.

DUN, FAX, LAP, SPP, HID, HCRP, FTP, OPP, HSP, PAN and BIP

Devices running profiles other than those above will not be able to be registered with Bluetooth Settings

# Bluetooth Information Exchanger

- Q: Transfer failed when sending a file using the right-click menu.
- FTP or OPP are the sending profiles available when you select a file, right-click it, and then click on [to Bluetooth] to send it. If the destination device does not support either of these profiles, you will not be able to send files using the right-click menu.

File transfer will also be unsuccessful if you use FTP to send a file to a device that only supports OPP.

In such cases, please click on [Bluetooth] > [Profiles] from [Bluetooth Information Exchanger], and enter the settings shown under Transfer mode.

Q: Cannot open shared folder on other device with "File Transfer".

 The other device may have a certain security level enforced (Non-connectable mode etc). Please confirm the security settings of the other device.

Please enter the correct password if you are asked to enter one.

# Remote Camera

• See "Using a camera"

# Bluetooth Local COM

Q: Cannot add port

• A maximum of 64 virtual COM ports can be added. You will be unable to add another port if 64 ports have already been configured.

# 6.2 Using a wireless modem station

Q: Modem station cannot be detected.

• If the modem station is connected to and is being used by another device, the modem station will be undetectable even if you search for it.

Q: Cannot connect to modem station

• If the modem station is connected to and is being used by another device, no other device will be able to connect to the modem station.

Q: Bluetooth passkey entry failed

 The Bluetooth passkey (PIN code) comprises a sequence of alphanumeric characters, with the letters able to be rendered in upper and lower case.
 If [Caps Lock] is on, the Bluetooth passkey may not be able to be entered correctly.

Q: Cannot connect to telephone line

• Please ensure that the telephone cable is connected from the socket to the "LINE" terminal on the modem station.

# Note

. If the telephone cable has come loose because it has not been fully inserted into the socket, the resulting poor contact may prevent data from being transmitted accurately.

. Communication will be impossible if the interior of the cable has been broken. Please replace the cable with another one.

• Please ensure that the two slide switches on the underside of the main unit have been set to the "NORMAL" and "MODEM" positions respectively.

Q: Cannot connect to the Internet

- The telephone number of the connection (i.e., the telephone number for the access point of your Internet service provider) may not be correct. Please check the telephone number.
- The user ID and/or password for the provider with whom you have signed up may have been entered incorrectly. Please check the user ID and password.
- The default connection may have been configured with different settings. Please set the connection configured for mobile telephone use as the default connection.
- When you place a call using a company switchboard or other exchange, the system may require you to enter a "0" before the telephone number itself. Please check the type of telephone line you are using.

Q: Cannot send or receive faxes

 Once you have registered a wireless modem station as your fax server, you will need to enter the fax settings from the [Printer and Faxes] window in the Control Panel.
 Please refer to "Using a modem station for fax transmissions" for information

Please refer to "Using a modem station for fax transmissions" for information on the configuration procedure.

- The telephone number of the fax destination may have been entered incorrectly. Please check the telephone number.
- If the setting under COM Auto Connect Settings has been set to "Off", a connection will not automatically be established with the modem. Please connect to the modem manually.
- When you place a call using a company switchboard or other exchange, the system may require you to enter a "0" before the telephone number itself. Please check the type of telephone line you are using.
- The fax service may not have been enabled for sending (or receiving). Please check the settings by following the procedure below.
  - 1. Open [Printers and Faxes] from the Control Panel, right-click on the [Fax] icon, and then click on [Properties].

Op	en

# 6.3 Using an access point

Q: Access point cannot be detected.

• If the access point is connected to and is being used by another device, the access point will be undetectable even if you search for it.

Q: Cannot connect to access point.

• If the access point is connected to and is being used by another device, no other device will be able to connect to the access point.

Q: Cannot connect to LAN.

• The LAN cable may not be properly connected to the access point. Please check the connection status.

# Note

. If the LAN cable has come loose because it has not been fully inserted into the socket, the resulting poor contact may prevent data from being transmitted accurately.

. Communication will be impossible if the interior of the LAN cable has been broken. Please replace the cable with another one.

 The access point may not have been configured correctly, and may not be able to maintain the connection to the LAN.
 Please refer to the product instruction manual for information on how to configure your access point.

Q: Cannot connect to the Internet.

• If you are using a LAN to connect to the Internet, the LAN environment of the company or location where you are trying to establish the connection may require you to connect via a proxy server.

# 6.4 Using a mobile telephone

Q: Mobile telephone cannot be detected.

• If the mobile telephone is connected to and is being used by another device, the mobile telephone will be undetectable even if you search for it.

Q: Cannot connect to mobile telephone.

• If the mobile telephone is connected to and is being used by another device, no other device will be able to connect to the mobile telephone.

Q: Cannot send images to mobile telephone.

• Please use the appropriate transfer method, according to the profiles supported by your mobile telephone.

If OPP is supported: right-click on a file to send it

If BIP is supported: use "Image transfer" under Bluetooth Information Exchanger to send images

- Q: Cannot connect to the Internet.
- The telephone number of the connection (i.e., the telephone number for the access point of your Internet service provider) may not be correct. Please check the telephone number.
- The user ID and/or password for the provider with whom you have signed up may have been entered incorrectly. Please check the user ID and password.
- The default connection may have been configured with different settings. Please set the connection configured for mobile telephone use as the default connection.

Q: Cannot send or receive faxes.

• Once you have registered a mobile telephone as your fax server, you will need to enter the fax settings from the [Printer and Faxes] window in the Control Panel.

Please refer to "Using a modem station for fax transmissions" for information on the configuration procedure.

- The telephone number of the fax destination may have been entered incorrectly. Please check the telephone number.
- If the setting under COM Auto Connect Settings has been set to "Off", a connection will not automatically be established with the modem. Please connect to the mobile telephone manually.
- The fax service may not have been enabled for sending (or receiving). Please check the settings by following the procedure below.
  - 1. Open [Printers and Faxes] from the Control Panel, right-click on the [Fax] icon, and then click on [Properties].

5. Click on the [OK] button.

# 6.5 Using a PDA

Q: Cannot make an ActiveSync connection.

- Please confirm that you have installed ActiveSync v3.7 or higher on your PC.
- ActiveSync is installed to COM7 as a default. Please refer to "Synchronizing data with a PDA" and re-configure your ActiveSync connection.
   If a port other than COM7 has been used, please amend the ActiveSync connection settings accordingly.
- Q: Cannot locate a saved file.
- The type of file sent to your PDA, as well as the profile used to send the file, may affect where folders saved on your PDA are located.

Examples: Images transferred to your PDA using "Image transfer" > saved in the "Image transfer" folder Images transferred to your PDA using "File transfer" > saved in the "Shared folder"

# 6.6 Using a camera

Q: Camera cannot be detected.

• If the camera is connected to and is being used by another device, the camera will be undetectable even if you search for it.

Q: Cannot connect to camera.

• If the camera is connected to and is being used by another device, no other device will be able to connect to the camera.

Q: Images from the camera can be displayed, but no pictures can be taken.

- The memory card in the camera may be full. Please make a backup of all your necessary data on alternative media, then delete the images from the memory card, and ascertain how much free space remains.
- Q: Camera images do not appear in window.
- The camera may not have been set to remote camera mode (image browse mode, configuration mode, etc).

Certain cameras will end the Bluetooth connection automatically if you change the settings in a mode other than remote camera mode. Please re-connect to the camera when you next wish to use the device in remote camera mode.

# 6.7 Using a Bluetooth Headset

Q: Bluetooth Headset cannot be detected.

• If the Bluetooth Headset is connected to and is being used by another device, the Bluetooth Headset will be undetectable even if you search for it.

Q: Cannot connect to Bluetooth Headset.

- If the Bluetooth Headset is connected to and is being used by another device, no other device will be able to connect to the Bluetooth Headset.
- A Bluetooth connection will be impossible if the Bluetooth Headset is connected to a power adaptor.

Please remove the power adaptor and re-connect.

Q: Sound cuts out/cannot hear anything.

 Using a Bluetooth headset with other Bluetooth devices may cause problems such as interruptions in sound, reduced transfer speed or failure during file transfer, and disconnection of the other Bluetooth devices. We strongly recommend using a Bluetooth headset on its own and not in connection with other Bluetooth devices.

- Please confirm that the Bluetooth Headset is being operated correctly (for example, ensure that the correct mode (audio or communications) mode has been selected).
- Please confirm that the voice file or CD is being played back normally on your PC.
- Please check the volume settings on your Bluetooth Headset and PC.
- If Windows Media Player or another audio-related application is active when you try to connect your Bluetooth Headset, you may find it impossible to connect properly to the Bluetooth Headset, or even to use it at all. Please start such applications after you have connected to the Bluetooth Headset.

# **Appendix A Specification**

Model	BT-510U	BT-520U
Bluetooth Spec. Compliance	Bluetooth V2.0+EDR	
Transfer rates (Max)	Max UART baud rates of 3Mbps	
Operating Voltage	+5V	
USB Standard	USB 2.0	
Operating Distance	100 m in free space	10 m in free space
Antenna	2dBi Antenna	0 dBi printing Antenna
Dimension	49.36 (L) x 17.99(W) x 7.55(H) mm	
Power Consumption	TX → 120mA RX → 58mA Stand By → 50mA	TX $\rightarrow$ 60mA RX $\rightarrow$ 58mA Stand By $\rightarrow$ 30mA
Environment	Operation temperature: 0 ~ 60 Degree C Storage temperature: -10 ~ 70 Degree C Humidity: 5 ~ 90% non-condensing	
Radio		
Spread Spectrum	Frequency Hopping Spread Spectrum (FHSS)	
Frequency Range	2402~2483.5MHz	
RF Channels	79	
Polarization	Omni-directional	
Modulation	GFSK for 1Mbps, /4-DQPSK for 2Mbps, 8-DPSK for 3Mbps	
Output Power	13.35dBm	1.74dBm
Receiver Sensitivity	<-82dBm at < 0.1% BER	<-82dBm at < 0.1% BER
Base Band		
Physical Links	Support of ACL link with data rate up to 3Mbps	
	Support of SCO link	
Network Capabilities	Support of piconet connections	point-to-point and point-to-multipoint
